MY PASSION FOR **WILDLIFE**
PHOTOGRAPHY

Experienced User Interface Designer with a focus on optimal efficiency, simplicity, and functionality

PROFESSIONAL SUMMARY

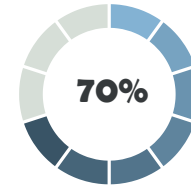

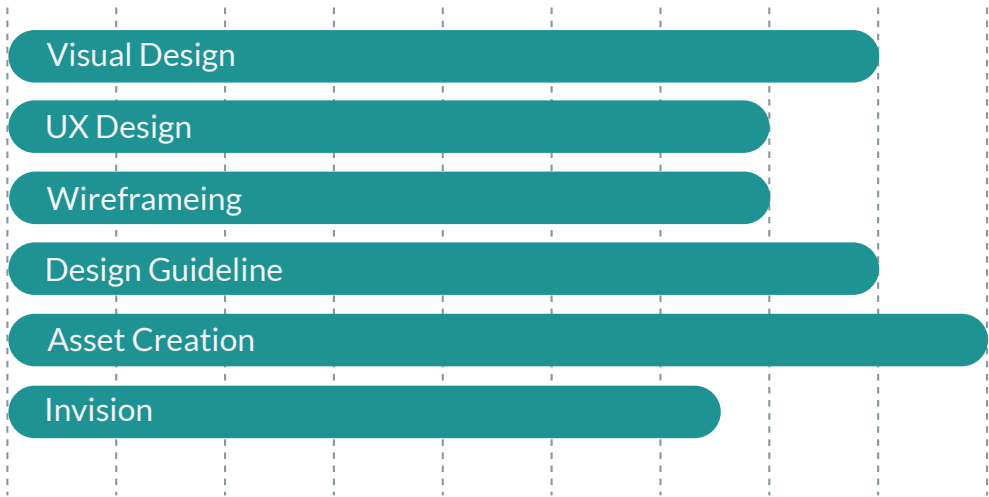

I am an experienced UI + UX + Visual Designer who focuses on designing solutions that balance user experience with business goals. I believe that good design creates value. Because design isn't only a career, it's a lifestyle. It's not just about making pretty things, it's the process from conception to final product

WHAT DO I DO

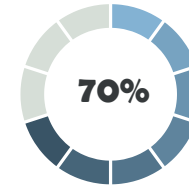

More than fifteen years of experience designing solutions for complex web- and mobile-based business applications, in addition to another decade in designing a variety of innovative desktop software products. Contributed to all levels of the user experience and in all phases of the product development lifecycle, from defining a product's overall architecture and structure, to iterating, specifying, and polishing the interaction details for specific features. Other highlights include proficiency in user-centered design techniques, creating high-quality deliverables that communicate the intended user experience, and adept at working in collaboration with product development teams
